2025-26 GCU COST OF ATTENDANCE

Disclaimers

1. All expenses are based on the average cost to attend programs at each program level. Some programs also have program premiums. View the [list of programs](#) with program premiums.
2. "General" budgets are an average cost for any program not listed in other categories. The traditional campus is term-based and tuition is charged at a block rate (12-18 credits) for full-time students. The online campus tuition is charged by credit and there were varying rates based on the discipline and program level. The average cost paid by online students for an academic year is included in the COA. For the specific costs on your chosen program of study and modality, see our [on-campus](#) and [online and evening](#) pages.
3. On-campus housing and food expenses are estimated based on the average costs incurred by students living on campus. Off-campus housing and food are estimated based on averages for off-campus living. Students living with parents are assumed to incur the same food expenses but lower housing expenses than those living off campus. Students with special circumstances should discuss them with their university counselor.
4. The accelerated Bachelor of Science in Nursing (ABSN) program has a flat \$850 per credit charge for tuition and fees. On average, students take 16 credits per term; therefore, the rate listed is for the cost for 16 credits per term. The cost has been divided into separate tuition and fee categories for comparison to other programs.
5. Hybrid campus refers to a program offering that follows the traditional campus calendar. It balances online and in-person courses. Please work with your university counselor to inquire about the specific requirements of your program of choice. Costs based on students taking 24 credits per academic year.
6. Includes all doctoral programs and advanced graduate certificates.
7. ABSN students to confirm applicability of "other fees" with their Student Services Counselors (SSCs).
